

INDUSTRIAL AND CORPORATE MARQUEE HIRE

Aries Marquees was established in Merseyside over 32 years ago. We are a family run business led by 2 sisters' Lisa and Gaynor and have a wealth of experience when providing Marquee Hire.

Marquee hire is a fast efficient way to create space. Depending on requirements we can create different specifications depending on style required and budgets. Suitable for any industry, our customer database includes manufacturers, schools, nurseries, hospitals, hotels, councils, sports clubs and the construction industry.

We have a range of sizes available ranging from walkways to semi permanent hard sided structures. Our stock list is extensive as we invest in new additional stock each year.

ENDLESS POSSIBILITIES

As our stock is interchangeable we can add on extra space quickly if required to extend a structure at any time.

Our marquees are aluminium framed with a waterproof pvc covering and secured correctly to ensure they withstand wind speeds. Doors can be added during winter months to help with heat. We can also include lighting, flooring, carpets and create specific interiors and furniture if required.

We have previously worked with Encore installing marquees for an event at Seqirus Liverpool, and at a follow-up event providing marquee hire for social distancing. If you have a project in mind that may require a marquee, we would suggest a site visit to look at the space available. We have £10 million public liability insurance and all risk assessments in place.

We would very much appreciate an opportunity to become a supplier.

"I would highly recommend Aries Leisure after the provision of a fantastic service for a highly prestigious executive event in Liverpool on behalf of Seqirus Vaccines.

From start to finish the whole experience was seamless.

Gaynor and Lisa were very proficient in dealing with corporate clients.

Even last minute changes were turned around and delivered without any issues. They are certainly a company I would use again. They made it look so easy and have strong support from a network of specialist suppliers."

Mark Hughes, Seqirus
